OBJECTIVE

Motivated and detail-oriented Master of Computer Applications student, eager to begin a professional career in the tech industry. Soon to graduate from Lead College of Management, Palakkad, with a strong foundation in computer science concepts. Completed additional certifications in Python and Machine Learning, with hands-on experience through academic projects and practical applications. Known for being responsible, organized, and quick to learn new technologies.

EDUCATION

Master of Computer Applications (MCA)
Lead College of Management, Palakkad | First Sem CGPA: 8.4 | 2024 – Present

Bachelor of Computer Applications (BCA)
University of Calicut | CGPA: 8.4 | 2021 - 2024

INTERNSHIP EXPERIENCE

Software Engineer Intern
Assimilate Technologies Pvt Ltd (Pune) | Sep 2025 – Mar 2026
• Designed and developed secure Go-based microservices using gRPC and REST APIs, leveraging Gin and gRPC-Gateway for efficient frontend–backend communication.
• Built a scalable Policy Engine with PostgreSQL, enabling full CRUD operations and real-time policy evaluation for access and compliance decisions.
• Integrated frontend applications with backend services via gRPC-Gateway and REST endpoints, enabling seamless access request submission and policy evaluation workflows.

Machine Learning Intern
Cognifyz Technologies (Remote) | Mar 2025 – Apr 2025
• Built and optimized predictive models using Python and scikit-learn.
• Executed end-to-end ML workflows: preprocessing, training, evaluation.
• Strengthened teamwork and model tuning skills remotely.

PROJECT EXPERIENCE

Job Agent (AI Job Application Automation)
• Built an AI-powered job application tool using RAG pipeline and Groq LLM to parse JDs and generate tailored emails automatically.
• Implemented FAISS vector embeddings to match and rank resumes against job descriptions for smart resume selection.
• Integrated Gmail API with OAuth2 to send personalized applications with auto-attached resumes directly from the user's Gmail.

Resume Ranking System Based on Job Description
• Developed an intelligent resume ranking system using NLP techniques and a Random Forest Regressor.
• Extracted skills and experience from resumes and compared them with job descriptions to generate relevance scores.
• Streamlined the recruitment process by enabling HR teams to perform data-driven candidate screening and selection.

Intelligent Pothole Detection System
• Utilized computer vision and machine learning for real-time pothole detection using webcam feeds.
• Employed edge detection and contour analysis techniques to identify pothole regions accurately.
• Enabled efficient and cost-effective road monitoring and reporting through integration with a cloud-based system for government agencies.

AI-based Fire Detection System
• Designed and implemented a fire detection system using deep learning (Keras, TensorFlow) and image processing (OpenCV) in Python.
• Trained a Convolutional Neural Network (CNN) on custom fire and no-fire datasets, enhancing accuracy compared to traditional threshold-based methods.
• Improved fire detection response time, making the system suitable for real-time surveillance scenarios.

CERTIFICATIONS

• Python Basics – Certificate from Zanx (Jun 2023)
• Python Programming – Certificate from Kaggle (Dec 2022)
• Intro to Machine Learning – Certificate from Kaggle (Dec 2022)
• Pandas – Certificate from Kaggle (Dec 2022)

TECHNICAL & SOFT SKILLS

• Programming Languages – Python, JavaScript, HTML, CSS
• Web Development – React.js, HTML5, CSS3, JavaScript
• Machine Learning & Deep Learning – Scikit-learn, TensorFlow, OpenCV, Machine Learning Algorithms
• Libraries & Tools – OpenCV, Matplotlib, Seaborn, NumPy, Pandas, Jupyter Notebook, GitHub
• Soft Skills – Communication, Fast Learner, Time Management, Adaptability, Critical Thinking, Collaboration,

LANGUAGES

Malayalam (Native)
English (Intermediate)
